

The mullion reader is a proximity reader 13.56MHZ working with Passan Premium and Transit controllers. It sits directly on a wall without embedded box. It offers a significant reading distance of 3 cm.

Functioning :

A two-color led indicates the operating status of the reader: red to indicate that the reader is in use and green when the door is controlled and give the permission to enter.

Technical characteristics

13.56 MHz

- Dimensions (L x H x D): 78mmx43mmx17mm
- Power supply : 12VCC (supplied by the controller)
- Current: 30mA
- Wire gauge: 3 wires / 100m max
- Reading distance: up to 30mm
- Operating Temperature: -10 ° to +50 °
