

Easy Door Receiver is an RF access control system for small residential applications. It is an all-in-one product (controller and receiver) which has been designed for 2 gates and can manage up to 2000 users.

The same product can be managed either away from its installation place (remote management or so called Virtual Network Mode) or on site (standalone mode).

For remote management, all you need is an internet connection for our web software [www.easydoorcontroller.com](http://www.easydoorcontroller.com) and our USB encoder. Then you have to:

1-Note the controller N° of the installed product (written on top label)

2-Register on [www.easydoorcontroller.com](http://www.easydoorcontroller.com)

3-Program the transmitters/keys using the encoder which records one or several n° of allowed doors inside the transmitter.

To remotely delete permissions for a transmitter, you simply have to cancel that transmitter on the website and program a new one instead. At the first use of the new one on the controller, the old transmitter will be blocked instantly.

## Technical characteristics

			
13.56 MHz 868 MHz	1 to 2 doors	1 to 2000 users	Programming via web software

- Dimensions (W x H x D): 120mmx100mmx40mm
- Programming on site with master key or with programming terminal
- Wiring: 2 max fils/100m between the controller and reader
- Power supply: 12/24 Vac or Vdc
- Control relay: NC / NO
- Adjustable timer from 1 to 99 seconds
- Removable connections
- Operating temperature: -20 ° C to +60 ° C
