

The proximity keys are certified IP68 and IK08 (waterproof and high shock resistance). They have a metal eyelet to be placed on a key ring and contain a 8 hexadecimal code which can be not modified . The key uniqueness is guaranteed. The code is written to ease programming and identification. Possibility of personalization with screen printing or molding of the hull. The FD-010-012 proximity keys are compatible with all FDI 125 KHz readers.

Technical characteristics
