

Thanks to the integrated proximity and four buttons, the remote control is adapted to many situations. It is no longer necessary to have a remote control plus a key, for example, a button can control a gate, the seconde ones manages the garage door etc....and the proximity is used for pedestrian access. The remote controls are designed to last thanks to a metal eyelet for key ring, the engraving of the serial number on a recessed area. The uniqueness of the remote control is guaranteed. The code is written to simplify programming and identification.

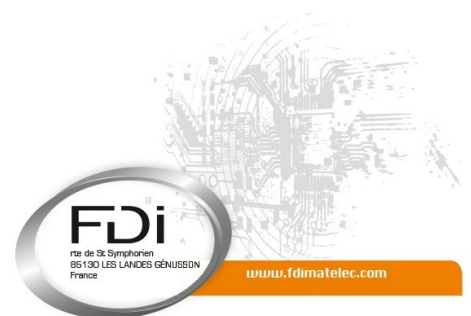

## Technical characteristics

433 MHz

- Dimensions (L X H X D): 79x38 x12mm
- Power supply : flat lithium battery 3V
- Engraving of a 8 digit alphanumerical number
- Average life of the battery: 22000 manipuans
- Coded in factory 4 billion possible ID.
- Customization on request.
- Operating Temperature: -10 ° C to +60°C
- Use it with the RF receiver FD-020-185 (Wiegand) or FD-020-190 (2SMART for IPassan)
- 
-
